

**Job Title: Field Inspector****Location: Moncton, NB****Company: JRD Engineering Ltd****About Us:**

JRD Engineering Ltd has been locally owned and operated since 1986 and is a leading engineering consulting firm specializing in municipal infrastructure projects. Our team provides land development consulting services to a diverse clientele throughout the province of New Brunswick. Join our dynamic team and contribute to shaping the future of our communities.

Job Description:

We are seeking a detail-oriented Civil Engineering Field Inspector to join our team. The Field Inspector will be responsible for overseeing construction projects, ensuring compliance with engineering plans, specifications, codes, and standards. This role requires a thorough understanding of civil engineering principles, excellent observational skills, and the ability to effectively communicate with project managers, contractors, and stakeholders. Daily shifts typically vary between 10 to 12 hours per day, and follow the contractor's schedule. This position is seasonal and typically follows the construction season (April to December).

Responsibilities:

- Conduct on-site inspections of municipal infrastructure projects, including water systems, sanitary sewer systems, storm sewer systems, and roads.
- Monitor construction activities to ensure compliance with project specifications, codes, and safety standards.
- Verify that materials used meet project requirements and standards.
- Maintain detailed records of inspections, observations, and any non-compliance issues.
- Utilize GPS equipment to assist contractors with construction layout.
- Prepare comprehensive reports on inspection findings, including photographs, measurements, and other relevant data.
- Communicate findings to project managers, contractors, and relevant stakeholders.
- Identify and document any deviations from the approved plans and specifications.
- Collaborate with project managers, engineers, contractors, and other stakeholders to address any issues or concerns.
- Provide guidance and recommendations to contractors on construction methods, materials, and best practices.
- Identify potential safety hazards and recommend measures to mitigate risks.

Qualifications:

- Minimum of three (3) years experience in the field of civil engineering.
- Civil Engineering Technologist Diploma is an asset.
- Proficient in reading and interpreting engineering plans and specifications.
- Capacity to work in a variety of environmental conditions and perform physical tasks.
- Personal vehicle with a valid driver's license.
- Bilingualism is considered an asset.

Benefits:

- Health and dental insurance.

How to Apply:

Interested candidates are invited to submit their resume and cover letter outlining their qualifications and experience to info@jrdeng.ca. Please include "**Field Inspector Application**" in the subject line. Only candidates selected for an interview will be contacted.
